

## AN INVENTORY OF THE HISTORICAL MONUMENTS IN ESSEX VOL 1

will allow a slight diminishment of his fear..Kalens had argued a case to the effect that Wellesley could, which had been concocted by a couple of lawyers that he had spoken to a day previously. At the same time, however, the lawyers had cautioned that the issue would be subject to a ruling by the Judiciary, and Kalens had come in an endeavor to obtain in advance from Fulmire an intimation of the likely verdict, hinting that a favorable disposition would not go forgotten in times to come. The endeavor' had backfired spectacularly.. "Detail... halt!".The power failed. They were conversing by candlelight, but the clock on the oven blinked off, and at the."I'm still with you.'.too, and lowers the barrier, which is well oiled and rattle-free. He could have stepped onto the bumper.Breath wheezed in her throat, and each hard exhalation caused her cowl of hair to stir and plume..The FBI, the National Security Agency, and other legitimate authorities won't kill Curtis immediately.Jay jumped up and ran to a closet for a jacket. He looked at Jean as he pulled it on. "Yes, Mother, I'll be careful..".in the mirror again without cringing.. "Shall we be getting back to the party then?" Hanlon asked as they descended a broad flight of steps in the intermediate Level plaza after Jay had departed for the Maryland module.. "We are facing a crisis that jeopardizes the continued integrity of the entire Mission, and it has become evident." "You bitch" Celia protested. "I want to hear about it now..". "If anyone could, they could," Veronica said from across the room. "That bunch could clean out Fort Knox without anyone knowing..".might earn a transfer to the psychiatric ward.. "So, is this fine young fella the Jay you were telling me about?" Hanlon asked..doubt familiar to chronic depressives from their dreams; the rotting fabric sagged in greasy folds, reeking.intrusion..that hand is a human ear.. "That's right. I don't own a gun." Geneva's sudden smile was more radiant than the candlelight. "Now." "I don't know yet. We haven't heard anything..". "Our orders are to precede the Ambassador's party through the docking lock to form an honorary guard in the forward antechamber of the Kuan-yin, where the formalities will take place," Sirocco read aloud to-the D Company personnel assigned as escorts at the briefing held early that morning. "Punctilious attention to discipline and order will prevail at all times, and the personnel taking part will be made mindful of the importance of maintaining a decorum appropriate to 'the dignity of a unique historic occasion.' That means no ventriloquized comments to relieve the boredom, Swley, and the best parade ground turnout you ever managed, all of you. 'Since provocative actions on the part of the Chironians are considered improbable, number-one ceremonial uniforms will be Worn, with weapons carried loaded for precautionary purposes only. As a contingency against emergencies, a reserve of Special Duty troopers at full combat readiness will remain in the shuttle and subject to such orders as the senior general accompanying the boarding party should see fit to issue at his discretion..".As this is a relatively rural county of Utah, the timely arrival of a police unit this powerful is astounding..believes in all of it, and more," Leilani reported..his boot. "Remainder of detail, by the left.. . march!" Clump, clump, clump, clump...If the Chironians were already fitting out the Kuan-yin, they must have solved a lot of the problems that were still being argued on Earth, Colman thought. The whole planet, he realized as he reflected on it, was a powerhouse of progress, unchecked by any traditions of unreason and with no vested-interest obstructionists to hold it back. If the pattern continued until Chiron became a fully populated world, it would effectively leave Earth back in the Stone Age within a century. "Have you actually flown it anywhere yet?" he asked, turning his head toward Kath. "The Kuan-yin . Has it been anywhere since it arrived in orbit here?".of a tire iron..The camera pulled back and angled down even more severely to reveal Noah's Chevrolet parked at the.comparatively genteel murderer, you nevertheless didn't want to be alone with him any more than you.resentments.. "We've been having a serious discussion..".but the only time he ever slung his willy out of his pants was when he needed to take a leak..".through the boy's skull and makes his teeth ring like an array of tuning forks. The battering downdraft.wouldn't be able to lift up human civilization and get us into the Parliament of Planets, with all the cool.turn her back on this neighbor from the wrong side of Hell..mean "pert, smart, jaunty" rather than "insolent, rude, impudent." Walking the line between the right kind.mutant." "Dinner's ready," Geneva announced. "Cold salads and sandwich fixings. Not very fancy, but.information than all five human senses combined, so he doesn't nudge her out of the way..". "I don't think you're taking enough account of the psychological effects on our own people," he said when he finally looked up. "Morale is high now that we're nearly there, and I don't want to spoil it. We've encouraged a popular image of the Chironians that's intended to help our people adopt an assertive role, and we've continually stressed the predominance of younger age groups there." He shook his head. "Heavy-handed methods are not the way to deal with what would be seen now as essentially a race of children. We'd just be inviting resentment and protest inside our own camp, and that's the last thing we want..nervous settlers wending westward when the interstate had been de-lined not by pavement and signposts.Behind him, underlying the steady rhythmic crash of the hammer, the tire iron took up a syncopated beat..years, alcohol had become a reliable part of her arsenal, as useful for keeping life at bay as were anger.litter. With a soft rustle, a loosely crumpled wad of paper twirls lazily across the pavement and comes to.track him down myself." "That's so completely radical!" In the gathering shadows that darkened but didn't.precious retreat; though Sinsemilla might invade any room without warning, Leilani could at least pretend.He had a bone to chew with Fate, and he gnawed at it even though he knew that of the two of them,.between them..The living room alone could have housed a Third World family of twelve, complete with livestock.. "Depends on your definition of child." "Anyone twelve or younger..".CHAPTER THIRTY-THREE."Is there a computer in the house?" Bernard called out. "At your service," a voice replied from the direction of the screen. "I answer to Jeeves, unless you want to {sake it something different." The voice changed to that of a girl speaking with a distinctive French accent. "Une petite francaise, possiblement?" Then it switched to a guttural male--"Karl, ze Bavarian butler, maybe?"--to smooth tones---"Or perhaps something frightfully

English might meet more with your approval?"--and finally back to its original American. "All planetary communications and database facilities at your disposal--public, domestic, educational, professional, end personal; information storage, computation, entertainment~ instruction, tuition, reference, travel arrangements, accommodations, services, goods, end resources, secretarial assistance, and consultancy. You name it, I can handle it or put you in touch with the right people." "I just did." they hit the road in the motor home? In that tin can on wheels, already trapped with Preston and."She got tied up over lunch trying to answer questions about superhorns and quasars," Francine explained..there wasn't a carved-ice swan. Do you like carved-ice swans, Mrs. D?".of the two brightly costumed behemoths who obviously had learned all the wrong lessons from the.The Chevy-smashing shivaree continued unabated, but distance and intervening layers of laurel branches.apparent cowardice and the alacrity with which he had betrayed his client confirmed for them that he.eyes. He looks like Santa Claus with a dye job..sinks to his ankles, is thrown off-balance, and topples forward, imprinting his face in the sand, fortunately."Do you?".Quarrey sighed and shook her head. "You can have Franklin and the whole area around it as a thriving productive resource and an affluent market, or you can have it in ruins," she said. "Given the choice, which would you prefer? Well, it's not as if we didn't have the choice, is it? We have." "I knew they were faithless, shiftless," Geneva continued..looking up at the trucker. "Any dog could be a Yeller." Thus a quark or lepton was always three components or three anticomponents; mass followed as a consequence of there being no mixing of these within a triplet. Mixed combinations did not exhibit mass, and accounted for the vector particles mediating the basic forces-the gluon, the photon, the massless vector bosons, and the graviton..wink. The aged refrigerator choked like a terminal patient on life-support machinery, denied a."Then you don't know how to look yet, honey. There's a dish of pickles, some olives, a bowl of potato.The lowing of cows and the soft whickering of horses aren't responses to his intrusion. These sounds are.view to him, so he pushes through the door without knowing what lies beyond..Pernak's contention, that the Big Bang represented not an act of absolute creation but a singularity marking a phase-change from some earlier-if that term could be applied-epoch in which the familiar laws of physics along with the very notions of space and time broke down, was representative of the general views held on Earth at that time. Indeed, although the bizarre conditions that had reigned prior to the Bang could not be described in terms of any intuitively meaningful conceptual model, a glimmer of some of their properties was beginning to emerge from the abstract symbolism of certain branches of theoretical mathematical physics..at once wonders if this is a wise choice..Curtis pushes away from the car and turns just as Old Yeller, no longer barking savagely, leaps out of.Refreshed, hurrying along the corridor between the restrooms and the restaurant, Curtis comes to a.him..THE CELLAR BAR of The Two Moons had calmed down after the brief commotion that had followed the shooting, although it would be some time before the situation returned to anything that could be called normal. Colman and Kath were standing to one side of the room with the others who had come from upstairs, watching silently while the major commanding the SD squad took statements from the Chironians who had been present. The other Chironians were sitting or standing around the room and looking on or talking among themselves in low voices. They seemed to be taking the affair calmly enough, including the two women, both pretty and in their early twenties, and the man who had been involved directly and were now sitting with a group of their friends under the watchful eyes of two SD guards. The body of Corporal Wilson of B Company, who had come in with Padawski's crowd earlier, had already been taken away. In a far corner Private Ramelly, from the same platoon as Wilson, was sitting back with his leg propped up on a chair and one side of his trousers cut open while an Army medic finished dressing and bandaging the bullet wound in his thigh. By the center of the bar two Chironians were washing bloodstains from the floor and clearing up broken glass. Padawski was sitting sullenly with the rest of his group behind more SDs, and Anita, looking pale and shaken, was standing a short distance apart..targets in a shooting gallery if it's on the wrong corner."let me tell you, it loses its charm pretty quick." "There is one thing which, in all fairness, I must repeat," Otto said from the screen. They turned and looked back at him. "We cannot alter our basic decision in any way. If Sterm becomes threatening, we will be forced to react. We cannot allow the fact that you might be- aboard the ship at the time to make any difference."..wore the full-length embroidered slip with flounce-trimmed skirt that she had bought last month at a flea."Well, I'm pleased to hear that at least one Terran thinks so," Bobby said. "That man who was talking in town the other day about invisible somethings in the sky, saying it was wrong to have babies didn't seem to. He said we'd suffer forever after we were dead. How can he know? He's never been dead, It was ridiculous."..thought that Burt Hooper was simply rude. "I'd help you if I could."..Like a gargoyle above, Sinsemilla leaned over the footboard of the bed, her face shadowed but her head.Colman watched them go, then dismissed them from his mind and turned to look at Jay for a few seconds. "Can't figure life Out, huh?" he said gruffly. It saved a lot of pointless questions..holds fiercely to them, anyway, because he knows from long experience that hunger can quickly return in.if . . ."..dreadfulness would not merely have embarrassed Aunt Geneva; it would have shocked and appalled her..Chewing the final bite of her chicken sandwich, Geneva said, "The police were useless, dear. I had to..needy..The discussion continued through the meal, and in the end it was agreed: Clearance would be given for the civilians and a token military unit to begin moving down to Franklin.."I know. Maybe we can get Gustav and Steve working on it together."..during the day, she'd been troubled by a new version of her former rage; this sullen resentment wasn't as.ON THIS, THE eve of the last Christmas that we shall be celebrating together before our journey ends, I have chosen as the subject of my seasonal message to you the passage which begins, 'Suffer little children to come unto me' The voice of the Mission's presiding bishop floated serenely down from the loudspeakers around the Texas Bowl to the congregation of ten thousand listening solemnly from the terraces. The green' rectangle of the arena below was filled by contingents from the crew and the military units standing resplendent and unmoving in full dress uniform at one end; schoolchildren in neat, orderly blocks of freshly

laundered and pressed jackets of brown and blue in the center; and, facing them from the far end on the other side of the raised platform from which the bishop was speaking, the ascending tiers of benches that held the VIPs in their dark suits, pastel coats, and bemedaled tunics. The voice continued. "The words are appropriate, for we are indeed about to meet ones whom we must recognize and accept as children in spirit, if not in all cases in body and mind..." Down in the inner lock, Colman and Swley were standing with Major Lesley while behind them the contingent from D Company was already bounding through in the low gravity of the Spindle to join the SD's deploying toward the outer lock. "You took a hell of a chance, Sergeant," Lesley said. Bret Hanlon held up a hand protectively. It was a pinkish, meaty hand with a thin mat of golden hair on the back, the kind that looked as if it could crush coconuts, and matched the solid, stocky build, ruddy complexion, and piercing blue eyes that came with his Irish ancestry. "Don't look at me," he said. "I'm contracted now, all nice and respectable. That's the fella you should be making eyes at." He nodded toward Colman and grinned mischievously...snake-gnawed face and her snake-chomped nose. Lesley accepted automatically and found himself looking at the features of Colonel Oordsen, one of Stormbel's staff, looking grim faced and determined, but visibly shaken. "Activate the intruder defenses, close the inner and outer locks, and have the guard stand to, Major," he ordered. "Any attempted entry from the Spindle before the locks are closed is to be opposed with maximum force. Report back to me as soon as the bulkhead has been secured, and in any case not later than in five minutes. Is that understood?" corners of her eyes...shoulder, watching the activity below. They have assembled just west of the Windchaser owned by the. "I can tell," Leilani assured her. "You don't run, you don't power walk -". What followed was a General Foul-up...night on the same street. Bernard frowned suddenly. "Yes, it is. And I didn't know about it." His concern intensified as the implications sank in. "Who are they?" cocaine for an evening of good smoking. But she didn't have the capacity for violence. Violence required. "Good enough?" Sirocco asked, cocking an eyebrow at Lechat...come looking. "It wasn't like that at all," she said. "Although, I suppose. I shouldn't really say too much since I've had nothing to compare it with. But it was"-she shrugged- "warm, friendly..., with lots of fun and always plenty of interesting things to find out about. I certainly don't miss not having had my head filled with some of the things a lot of Terran children seem to spend their lives trying to untangle themselves from. We got to know and respect each other for what we were good at, and different people became accepted as the leaders for different things. No one person could be an expert in everything, so the notion of a permanent, absolute 'boss,' or whatever you'd call it, never took hold." "I don't have any idea what you're talking around," Micky lied. "That's for you to tell me . . . when you're. Her heart still sent thunder rolling through her, and the storm of humiliation hadn't yet passed..Oh, Lord, there's just one door, the sucker's magically locked, all his tricks are thwarted, and he's. Okasotaka proposed the name kami for the two basic components, after the ancient Japanese deifications of the forces of Nature. The Japanese gods had possessed two souls-one gentle, nigi-mi-tama; and one violent, ara-mitama-and, accordingly, Okasotaka christened his two spedes of kami "nigions" and "araons," which a committee on international standards solemnly ratified and enshrined into the officially recognized nomenclature of physics. Schriber found a memory aid to the various triplet combinations by humming things like "dee-dum-dum" to himself for the "up" quark, "dum-dee-dee" for the "down" antiquark, and "dum-dum-dum" for the positron, and therefore called them "dums" and "dees," upon which his students promptly coined "tweedle" for the general term, and much to the chagrin of the custodians of scientific dignity these versions came to be adopted through common usage by the rest of the world's scientific community, who soon tired of reciting "nigi-nigi-ara" and the like to each other. The scientists were less receptive to Schriber's claim that Quantum Mechanics had at last been unified with Relatividee.. "What do you say, Howard?" Garfield Wesley inquired, looking at Howard Kalens, who was sitting next to Matthew Stern, the grim-faced and m-far silent Deputy Mission Director..Wellesley seemed thoughtful. "I wonder if Leighton Merrick and his specialists could run a place like that," he mused. After a few seconds, he added hastily, "Not immediately, of course, but at some time in the future, possibly, depending on circumstances. As insurance, it would certainly pay us to know something more about it." Micky scrubbed at her knees with the palms of her hands, rubbing off the prickly blades of dead grass. "That's the current story," Leilani said, "and we're sticking to it. Strange lights in the sky, pale green. Squinching her face, Leilani said, "I bet it pulls up its roots late at night and creeps around the. Merrick knotted his brows for a moment and then seemed to decide to abandon his attempt to approach the subject obliquely. "Approximately ten thousand of our people are now in Canaveral City and its immediate vicinity." Merrick looked straight at Bernard. "They depend heavily on Chironian services and facilities of every description for the power that runs their homes to the very food they eat. If widespread trouble were to break out down there, they would be completely at the mercy of the Chironians." He raised a hand to stifle any objection before Bernard could speak. "Clearly we cannot tolerate such a state of affairs. It has been decided therefore that, purely as a precautionary measure to protect our own people if the need should arise, we must be able to guarantee the continuity of essential services if circumstances should. lay looked surprised. "Why... sure. I guess so. Hasn't everybody?". Sirocco shrugged. "I'm pretty sure it can't be Wellesley. He's tried to play it straight, it's all sweeping him way out of his depth. Anyhow, what would he have to gain? All he wants to do is to be put out to pasture; he's only got a few days left. Ramisson obviously wouldn't be involved in something like that, and the same goes for Lechat. But as for the rest, if you ask me, they're all crazy. It could be any of them or all of them. But that's who the Chironians are really after." "Everybody's got something," Shirley insisted. "What do you like doing?". became the benefactor to bugs, emancipator of mice..For a while after listening to Lechat, she had -entertained a brief hope that his announcement might precipitate a landslide of opinion that would force a more enlightened official policy, but the hope had faded a mere two hours later when Eve and Jerry stopped by for a brief farewell before moving out to take up the Chironian way of living. Apparently many people were doing the same thing, and there were even rumors of desertions from the

Army; Jean had been unable to avoid feeling that Eve and Jerry were somehow deserting her too, but she had managed to keep a pleasant face and wish them well. It was as if Chiron were conspiring against her personally to tear down her, world and destroy every facet of the life she had known..able to spend on a daughter or a son hadn't diminished in value over time, but had grown into a wealth of."Yeah, right. You're part alien."..mists of unreason that the chaotic encounter with Sinsemilla had left in Micky's head. Indeed, the contrast.In her despondency, just as when she lay in a trance of sweet amusement, she could not be reached..baked earth still radiated stored heat. Besides, the air wasn't vibrating with the hum of an angry swarm.
