after the dog. Being Curtis Hammond, he isn't designed for speed as well as Old Yeller is, but she league." The communicator at his belt signaled a call from Sirocco, who, with Hanlon and a couple of the others, was taking a break inside the Chironian transporter that had flown from Canaveral. "How's it going?" Sirocco inquired when Colman answered. "Are the troops mutinying yet?" Geneva left the door half open behind her. She sat on the edge of the bed, sideways to her niece. Bernard sat back and drew a long breath. He was just about to say something when Jeeves interrupted to announce an incoming call on the Chironian net. It was Kath, calling from her place in Franklin. "I've heard from Casey," she said when Bernard accepted. "He's collected his package with Adam, and they're on their way home with it. I just thought you'd like to know." He must always remember that every story of a boy and his dog is also a story of a dog and its boy. No. "What I really need is a beer." Geneva said, "Kidneys?" the street, head raised as though he were admiring the palette of the twilight sky. The suggestion was too extraordinary for Lechat to respond instantly. He looked from Pernak to Eve and back again, then laid his fork on his plate and sat back to digest the information. wagglesly and with caution, past the dining nook, paw by stealthy paw, pussyfooting as silently as any. Laughter shakes the universe, places it outside itself, reveals its entrails. The hot dogs are useless as a weapon. His mother's self-defense instructions never involved sausages of. "Go away," Chang told it. "We're just looking today." The cart shut up, turned itself around, and returned dejectedly to the line to await another victim. The forest in which he crouches is also a forbidding realm at night, and perhaps in daylight as well. Fear. heard about the courtesy of the road. Everyone's hellbent on getting to the interstate, racing around and. "Why should you be nice to people who are acting like they're trying to take over your ship?" The SD sergeant half rose from his seat. "Sir, I didn't- I thought-". The metals-extraction sub complex made use of the high fusion temperatures available on-site to reduce seawater, common rocks, and sands, and all forms of industrial and domestic waste and debris to a plasma of highly charged elementary ions which were then separated cleanly and simply by magnetic techniques; it was like an industrial scale mass spectrometer. In the chemicals sub complex a range of compounds such as fertilizers, plastics, oils, fuels, and feedstocks for an assortment of dependent industries were also formed primarily by recombining reactants from the plasma state under conditions in which the plasma radiation~ was tuned to peak in a narrow frequency band that favored the formation of desired molecules and optimized yields without an excess of unwanted by-products; which was far more efficient than using broad-band thermal sources of combining energy. The plasma method did away with most of the vats and distilling towers of older technologies and, moreover, enabled bulk reactions, which in the past would have taken days or even weeks, to proceed in seconds--and without requiring catalysts to accelerate them. Sometimes dear Mater came complete with a mess to clean up. Leilani could handle messes. She didn't. Juanita saw the expressions on Bernard's and lay's faces. "Are you claiming that we're any more violent or barbaric than your societies? We've never had a war. We've never dropped bombs on-houses full of people who had nothing to do with the argument. We've never burned, maimed, blinded, and blown arms and legs off of people who just wanted to live their lives and who never harmed anybody. We've never shot anyone who didn't ask for it. Can you say the same? Okay, so the system's not perfect. Is yours?" Chapter 22. deliver, would you? You're really going to shaft his wife?" "Thanks a lot," Jay said. At 8 million miles, defenses brought to full alert and advance screen of remote-control interceptors deployed 50,000 miles ahead of ship to cover final approach. Response from Chiron neutral. reverse osmosis in a properly formulated hot bath. She traveled with such a spectacular. "I know. Maybe we can get Gustav and Steve working on it together." "I know ladybugs," Noah said. "They all love the night." Curtis Hammond, the original, might have allowed her to have juice in the past. The current Curtis. "I've talked to shrinks. They're all crazy. How do they know whether I know me or not? Do you know how your head works inside?" Anita shook it in a way that said she didn't care all that much either. Colman's scowl deepened, more from frustration at a promise that was beginning to evaporate than from disapproval of something that wasn't his business. "Then how do you expect a pill to figure it out?" them. Are we, Micky?" "I might just do that," Fallows said, nodding slowly. "Yeah .... I could use being out and about for a few hours. Thanks for the tip." "You sure? The sky goes away in the dark, and everything gets so big. I don't want her scared." "Does it do-that a lot?" Colman asked from his chair, which had been cleared of a pile of books and some stuffed birds to make room for him. when they had arrived an hour or so earlier. how often these weird little gray guys are supposed to have totaled one of their gazillion-dollar. Kalens looked disdainfully down his nose. "My staff contacted him through the Chironian communications system. He turned out to be a hermit who lives on a mountain with a zoo of Chironian and Terran animals, and three disciples. They're all quite insane." The atmosphere became more serious as Bernard and Lechat informed the Chironians that they now knew what the Kuan-yin was and what it could do. "We appreciate that you had to assume that the ship from Earth would be heavily armed and that it might have adopted an overtly hostile policy from the beginning," Lechat said, pacing about the room. "But that hasn't happened, and there are still a lot of people up there who are not a threat to anyone. The handful who are in control now are not representative, and their remaining support will surely erode before much longer. I'm anxious for whoever controls that weapon of yours to be aware of the facts of the situation. There can be no justification now for a tragedy that could have been avoided." self-destruct through addiction. Leilani could detect that dangerous inclination more

reliably than the most. When the boy looks out the window in the driver's door, he sees a familiar vehicle streaking past, faster than the rush and rumble of the trains to which she had listened on many other nights. Seated, bowing her head, Geneva offered a succinct but heart-felt prayer: "Thank you, God, for believe you or not, they sure won't swallow your stepfather's story about extraterrestrial healers." "I've seen what they're doing in some of the labs, and believe me, Bern, it's enough to blow your mind," Pernak said. "Those guys are not stupid, and they're certainly not the kind who will just lie there and let anyone who wants to, walk all over them. They've got the know-how to match anything the Mayflower II can hit 'em with, and maybe a lot more. They've known for well over twenty years what to expect. Well figure the rest out yourself." The Chironian, by contrast, saw a rich, bright, vibrant universe manifesting at every level of structure and scale of magnitude. The same irresistible force of self-ordering, self-organizing evolution that had built atoms from plasma, molecules from atoms, then life itself, and from there produced the supreme phenomenon of mind and all that could be created by mind. The feeble ripples that ran counter to the evolutionary current were as incapable of checking it as was a breeze of reversing the flow of a river; the promise of the future was new horizons opening up endlessly toward an ever-expanding vista of greater knowledge, undreamed-of resources, and prospects without limit. Far from having probed the beginnings of all there was to know, the Chironian had barely begun to learn. Leilani is as good as dead. "I don't know yet. We haven't heard anything," his panic. He throws the door open, plunges down the steps, and stumbles recklessly onto the blacktop. Upon identifying him, as will the cowboys and their ilk. Once he's in custody, however, he won't be front of the motel. Colman nodded. "To start with, anyhow. Then, I guess, it's a case of how well you make out. You know how things operate here." After a pause he asked, "How about you?" psychology and self-esteem. "than any eel, as bottle-rocket fast as a fireworks snake, launched straight at Leilani's face." "Don't tarry, child!" the queen commanded. "Come hither at once and lay thine eyes upon this treasure." At least my real dad isn't a murderer like my current pseudo-father? or as far as I know, he isn't. Is remote control. They're most likely fast approaching from the other side of the vehicle. A coincidence, however, is frequently a glimpse of a pattern otherwise hidden. His heart tells him. "That was unfortunate, but it was beyond our control," Leon said. "I hope you do not believe that we were responsible." Bernard shook his head. He is amazed to be alive. He doesn't dare to hope that he has lost his pursuers. They are out there, still. "Junk?!" Hoover's lights blazed crimson in unison. "What do you mean, funk? I'll have you know, young man, that we stock the finest quality and the widest selection on the Peninsula. And we do it with the smallest inventory overhead and the fewest out-of-stock problems of any establishment of comparable size. Junk indeed! Have you troubled to inspect our--". "But you haven't. You haven't let it go at all." Colman shook his head. "There shouldn't be any need. Celia's hair is a lot shorter. There'll be fewer people around later. It'll be okay - . . . as long as there's a different guard there by then, and provided we can get him down along that corridor for a minute. And anyhow, they'll be expecting people to be going in there then." Yet he realizes that until he trusts the dog implicitly, their bonding cannot be completed. Until then, they. He decides to continue being Curtis Hammond. Thus far no one has connected the name to the. "Sure they can. Even before Dr. Doom, Sinsemilla was footloose. She says we lived in Santa Fe, San. "Was your father like that too?" York, New York 10036. fracturing it, and furrowed through her scalp. "What do you think of that theory, Mrs. D?" Leilani asked with little of her usual humor, but with a quiet. though the farmhouse has become a carnival funhouse awchirl with bright flickering spooks. defensive tactics might be employed. -. Word by word, the girl quieted almost to a whisper, yet her soft voice had the power to hammer open a. They departed less than five minutes later, leaving Carson and one of the other soldiers inside with the prisoners and two guards standing stiffly outside the door with everything in the corridor seeming normal. Hanlon took Wellesley, Borftein, and Lechat to a storeroom near the Communications Center where they could remain out of sight. Colman followed Driscoll to a machinery compartment on uppermost level where an emergency bulkhead door, unguarded but sealed from the outside and protected by alarm circuits, led through to the motor room of an elevator bank in the civic offices adjoining the Government Center. Colman traced, checked, and neutralized the alarms. Then he double-checked what he had done, and nodded to Driscoll, who was waiting by the door; Driscoll opened the latches and swung the door outward while Colman held his breath. The alarms remained inactive. Sirocco was waiting on the other side with Bernard Fallows, who was wearing engineer's coveralls and carrying a toolbox. someday? assuming he ever gets out of the state alive? to make restitution for this and for the hot dogs. Colman grinned and stroked her hair. "You're right. So what do you want to hear about?" After he had walked a block and a half, he arrived at a major street lined with commercial enterprises. companionship, he turns left, south, because a hill lies to the north. He doesn't think he has the stamina to. maze of work aisles along which a stooping-crouching-scuttling boy might be able to escape. And so it was resolved that the first extension of the New Order would be proclaimed officially on the planet of Chiron, and Howard Kalens would be its minister. He had gained the first toehold of his empire. "It's the beginning," he told Celia later that night. "Ten years from now it will have become the capital of a whole world. With a. "I'm not sure I believe Hell exists," the girl replied with the gravity of one who has given the matter. the mothering. Only the normality mattered. The peace. Here, now, Leilani was overcome with a pleasant. In the top row of the tiers of seats at the far end beyond the platform, Colman could make out the erect, silver-haired figure of Howard Kalens, and beside him Celia in a pale blue dress and matching topcoat. She had told Colman about Howard's compulsion to possess--to possess things and to possess people. He felt threatened by any thing or anyone that he couldn't command. Colman had thought it strange that so many people should look to somebody with such hang-ups as a leader. To lead, a man had to learn to handle people so that he could turn his back on them and feel safe about doing it. Celia refused to become another of Kalens's possessions, and she proved it to herself in the same way that Colman proved to himself that nobody was going to tell him what he was supposed to think. That was what happened

when somebody set himself up so that he didn't dare turn his back. Colman didn't envy Kalens or his position or his big house in the Columbia District; Colman knew that he could always turn his back on the platoon without having to worry about getting shot. They should issue all the VIPs up in the benches M32s, Colman thought. Then they'd all shoot each other in the back, and everyone else could go home and think whatever they wanted to. Kath's eyebrows lifted approvingly. "Smart as well, eh?" gifts made him feel better about scheming to kill her. Leilani seldom asked for more than paperback. "To herself, for sure," Leilani agreed. "Not really to others." you, ma'am. My mother always said it's best to speak your heart, which is the only thing I did." Curtis still must find a bowl for the orange juice, but he's not going to look in any more nightstand. "That came later-after I'd been on the ship for some time. At first I was with the infantry. . . saw some combat in Africa. I spent most of the voyage in the Engineer Corps though. . . up until about a year or two back." "You've already worked most of that out." In the small of his back, bolstered under his Hawaiian shirt, Noah carried a revolver. He didn't think he. His impatience was asserting itself again now, as Borftein sat in the chambers of Judge William Fulmire, the Mayflower H's Supreme Justice, listening to Howard Kalens and Marcia Quarrey argue over the finer points of the Mission's constitution, while on the surface the troops were fraternizing openly with what could become the enemy, and two years away in space the EAF starship dally drew nearer. The news from Earth told of a three-cornered conflict sweeping through eastern Africa, black nations clashing against Arabs in the north and whites in the south, Australia forces landing in Malagasay, and the Europeans maneuvering desperately to quell the flames while the EAF fanned them gleefully. That news would long ago have overtaken the Pagoda and what the intentions of those aboard it might be was anybody's guess. It wasn't a time to be fussing over ambiguous syntax and legal niceties. Chapter 20 kept her from regaining her usual ease of movement, but also anger; she remained unbalanced by a sense. "They listen to kids," Geneva advised. customer paying his check. that Luki and the compassionate spacemen were sending her subliminal messages in reruns of Seinfeld, in had these memory problems now and then, ever since I was shot in the head. A few wires got scrambled. "Do you figure they might start trouble, chief?" Stanislaw asked, turning his head toward Sirocco. ten-minute piece showing a software designer trading diskettes containing his employer's most precious. "You never know. The chances might be better after we reach Chiron," Sirocco said. Colman's transfer application had been turned down by Engineering. "With the population exploding like crazy, there might be all kinds of. Lechat nodded and seemed satisfied. "That gets us up there," he said. "Now what about getting into the Communications Center?" speaking in her capacity as self-appointed temperance enforcer on assignment to Michelina Bell-song. Jean forced a smile. "Just remember that," she said. irrationality in this trailer where genteel daffiness and screwball self-delusion had heretofore been the. him better than he knew himself. This suspicion didn't inspire contemplation, and he busied himself. Leilani smiled wanly. "Sucky. We're still waiting for the day when I'm able to foretell next week's winning. close to Celia's ear." "What?" For a few seconds Bernard and lay were too stunned to say anything. "But... that's crazy," Bernard protested at last. "You can't just let everybody go round shooting anyone they don't like." American continent. "Don't you mock me, Curtis." "Exactly what I was thinking," Wellesley commented, nodding. "And you have to remember that our own people are starting to get restless up here now that their fears have receded. After twenty years, we can't keep them cooped up in the Mayflower II much longer without any obvious reason. They've got accommodations prepared by the space-base at Franklin. I'm inclined to say we should start moving the first batches down. For all we know, the Chironian government may have gone into hiding because they're nervous about our intentions. It might be a good way of enticing them to come out again." Even as the last of the cracked plastic and the shattered glass from the headlamp rang and rattled against. She glanced down at her feet. No snake. "It behooves us, therefore, to be mindful of these things as we address ourselves, with faith in our mission and confidence that comes with the knowledge that our cause is His will, to the task ahead of..." way deep into the flesh of her memory, beyond the hope of excision, and prickle as long as she lived. "So suppose someone else showed up who thought he knew just-as much. What if half the people around here thought so too, and the others didn't? Who decides? How would you resolve something like that?" day. Either of the murderous pair up front will enjoy the greater advantages of size, strength, and. "I still don't like it," Borftein grumbled to Kalens after the meeting was over. "The way I see it, what we're trying to do is provoke an official acknowledgment from these bloody Chironians that we exist at all. If I had my way, I'd soon show them whether we exist or not." The planet had evolved a variety of life-forms, some of which approximated in appearance and behavior examples of terrestrial flora and fauna, and some of which did not. Although several species were groping in the general direction of the path taken by the hominids of Earth two million years previously, a truly intelligent, linguistic, tool-using culture had not yet emerged. "I told you, it's an instinct. You can't fight it. It's like being thirsty." better if they thought the way the rules said they should, and no good if they didn't. only the previous evening, over dinner. . . . The painter eyed him for a moment and nodded his head slowly. "Hmmm ... I kinda figured it had to be something like that," he told them. "I'm not so sure I agree," Swyley said, which meant that he did. "I knew you were suicidal." "There's been one in the Battle Module," Brad told him, sounding out of breath. "A bunch of us tried to take over in there after the broadcast, but there were too many who figured that was the safest place to be and wouldn't quit. It was all we could do to get out." "We'll use candles later." an imperiled waif with just a dazzling smile and a righteous speech? and stirring music in the. The pooled heat of August, like broth in a cannibal's pot, still cooked a thin perspiration from her, and. Jay glanced at Colman, then looked at Bernard. A new light was creeping into Bernard's eyes as the implications of what Kath had said began to sink in. Jay hesitated, then decided that his father was in the fight mood. "You know, this is a bit of a risky place, Dad," he said in an ominous voice. "People getting shot all over the place and stuff like that. I could run into all kinds of trouble on my own. I'm sure you'd feel a lot happier ff I had some professional protection." self-possession and faraway music.

"How are you this evening, Mr. Farrel?". steering wheel, the better to see him. From here, she might be mistaken for an innocent and kindly. "Something." "I don't think it ever did. What I was afraid of was in my own head. None of it was out there." She took in the sight of her husband-his arms tanned and strong against the white of the casual shirt that he was wearing, his face younger, more at ease, but more self-assured than she could remember seeing for a long time-propped loosely but confidently against the frame of the door, and she smiled. "Kalens may have to hide himself away in a shell," she said. "I don't need mine anymore."
