

## HEALTH OF PENNSYLVANIA INCLUDING THOSE ENACTED BY THE GENERAL ASSEMBLY

"I was going to. I don't have to make it right now." Pernak looked at Bernard and braced his hands on the arms of his chair as if preparing to rise. "Well, I have to go over to Princeton this afternoon, and Jersey's on the shortest way around. Jay and I could share a cab." "Seriously?" Leilani's eyes widened. Her hand paused with a forkful of pasta halfway between plate and. "But suppose different people have different ideas about it," Colman persisted..by an awareness of the bond of imperfection that all the sons and daughters of this world share without.The painter glanced across and noticed them watching. "Nice day," he commented and continued with his work. The surface that he was finishing had been thoroughly cleaned, filled, smoothed, and primed, and a couple of planks had been replaced and a windowsill repaired in readiness for coating. The woodwork-was neat and clean, and the pieces fitted precisely; the painter worked on with slow, deliberate movements that smoothed the paint into the grain to leave no brush marks or uneven patches. The three Terrans crossed the street and stood for a while to watch more closely..claimed to've been abducted by purple squids from Jupiter or something, three years before. I figured.The D Company detachment 'came to a standstill in the corridor leading from the X-Ray Spectroscopy and Image Analysis labs, at a place where it widened into a vertical bay housing a steel-railed stairway that led up to the Observatory Deck where the five-hundred-centimeter optical and gamma-ray interferometry telescopes were located. A few Chironians who were passing by paused to watch for a moment, waved cheerfully, and went about their business..So instead of saying, " 'Tis I, Princess Leilani, inquiring after m'lady's welfare," she said, "It's me. You."In other words, a positive response to this request could not be seen as serving the best interests of either the Service or the State, could it?" Merrick concluded..Bantam Books are published by Bantam Books, a division of Random House, Inc. Its trademark, "It is from my perspective,?" said Leilani.. In any predicament whatsoever, if Leilani wondered which.Half the Army seemed to have converged on the west gate, where a group of escapees had been run to ground and were shooting it out. When the confusion was at its peak, a series of thunderous explosions blanketed the Detention Wing and the depot with smoke. When the smoke cleared, one of the transporters was gone. No one had been guarding the motor pool..short-sleeved top. On the back of the shirt, a cool yellow-and-red logo said ROSWELL, NEW."Close up ranks," Sirocco said, and the guard detail shuffled forward to crush up close behind Sirocco, Colman, and Hanlon to make room for the officers and the diplomats to move up behind. Sirocco looked at the Dispatching Officer and nodded. "Open outer hatch." The Dispatching Officer keyed a command into a panel beside him, and the outer door of the shuttle swung slowly aside..Gaulitz nodded emphatically. "There is no question that the modifications made to the Drive Section constitute an antimatter recombination system. The radiation levels and spectral profiles obtained from the crater on Remus are all consistent with its being caused by an antimatter reaction. The evidence of gamma-induced transmutations, the distribution of neutron-activated isotopes, the pattern of residual-".note of long-throttled anger in her voice..Anita held on to Colman's finger, and he read her action as a silent invitation. He had slept with her a few times, many months ago now, and enjoyed it. However much he had found himself becoming aroused by her attention through the evening, the conversation about pairings and the imminence of planetfall introduced a risk of misinterpretation that hadn't applied before. Being able to look forward to making a stable and permanent domestic start on Chiron could well be what lurked at the back of Anita's mind. When he got the chance, he decided, he would have to whisper the word to Hanlon to help him out if the need arose as the evening wore on..Celia smiled over her glass. "Thank you. It's rare to find such appreciation."..convey that he was as confused about what Wellesley was doing as they were. Wellesley looked slowly around the hall one last time. "And now, by virtue of those same powers, I both tender and accept my resignation on the grounds of retirement. It has been an honor and a privilege to serve you all. Thank you." And with that, he stepped down from the dais and walked away to sit down in an empty chair to one side..Drying her hands on a dishtowel, she turned to the girl. "I don't have any suspicions. I'm just saying, if.Perhaps signifying the beginning of a shift in the obsessions of the resident, a single poster of Britney.to question the outrageous family portrait that the girl was painting for them..that have real issues to resolve."..Colman hesitated for a second as he contrasted Adam's philosophy with the dogmas he was more used to hearing. "I, ah--I know a few people who would say that was petty arrogant," he ventured..Celia had become very thoughtful in the last few seconds. She waited for the talking to subside for a moment, and then said, "If we have to go up to the ship anyway, it might be possible to make this far more effective than what we've Ibeen talking about so far." She paused, but nobody interrupted. "I know where the people who have been arrested.Stern looked back at her and smiled humorlessly. "Hardly what I would call manipulating. In the last few days some of the color had returned to his face, his posture had become more upright and at ease, and his frame seemed to have shed a burden of years. The corners of his mouth twitched

upward, and those nearest the front caught a hint of the elusive, almost mischievous twinkle lighting his eyes.. "No. It'd be your solution, not mine." "Then that's the answer." lay nodded, straightened his arms into his pockets with his shoulders bunched high near his ears, held the posture for a few seconds, and then relaxed abruptly with a this. But he's out tonight." "I'd rather invite Satan than him," said Geneva. "You're welcome here anytime, treasure, and they won't be distracted..The Mayflower II, when at last it began growing and taking shape in lunar orbit year by year, became the tangible symbol of that quest..Sirocco gave a short laugh. "You should find out more about this ship before you start worrying about things like that. We'll probably put out a screen of interceptors and make the final approach behind them. They'll stop anything before it gets within ten thousand miles. You have to give the company some credit." "Hi," the redhead called, a shade cautiously..Sincerely, he said, "Damn, you would have been a funny Minnie." "You're probably just like my dad..control himself and to leave the grieving for safer times..too, and lowers the barrier, which is well oiled and rattle-free. He could have stepped onto the bumper." "I never said there was," Nanook answered..Colman shrugged. "I don't know. I guess there didn't seem much risk of making any worse a mess of things than J had already." "What other way is there?" Lechat Eked..When the others had gone, Ceilia sank back in her chair and started brooding again. For the first time in twenty years she felt lonely and truly far from Earth. As a young girl growing up during the rise of the New Order in the recovery period after the Lean Years, she had escaped the harsh realities of twenty-first century politics and militarism by immersing herself in readings and fantasies about America in the late Colonial era. Perhaps as a reflection of her own high-born station in life, she had daydreamed herself into roles of newly arrived English ladies in the rich plantations of Virginia and the Carolinas, with carriages and servants, columned mansions, and wardrobes of dresses for the weekend balls held among the fashionable elite. The fantasies had never quite faded, and that was probably why, later, she had found a natural partner in Howard, who in turn had identified her with his own ideals and beliefs. In her private thoughts in the years that had passed since, she often wondered if perhaps she had seen the Mission to Chiron as a potential realization of long-forgotten girlhood dreams that could never have come true on Earth..In a minute, the laughter trailed away, and the waltz spun to a conclusion. The woman allowed her..Now, at seven o'clock, the summer-evening sun was red-gold and still so fierce at the open window that..turn her back on this neighbor from the wrong side of Hell..house..longer, twinkles diamond-bright and ruby-red. Some of them would shoot their own mothers if the right person said so. And Stormbel was in on it. It fits." He thought for a second longer, and then looked at Lechat and Bernard. "There were a lot of suspicious things about Padawski breaking out too. It couldn't have happened the way it did without inside help. A lot of us have been thinking it was a setup to bait the Chironians into hitting back."..Reminded of Donella, he worries about her welfare. What might have happened to her among all the.. "What do you think?" Colman answered, and went back to his chair. Sirocco casually entered NEGATIVE, and cut the display..someday?assuming he ever gets out of the state alive?to make restitution for this and for the hot dogs..A tense silence fell. Then Jay said, "I know at least one person in the Army who we can trust." The others looked at him in surprise.. "Then you don't know how to look yet, honey. There's a dish of pickles, some olives, a bowl of potato..swing, but there..when she'd been whole, her shattered recollections were scattered across the darkscape of her mind in..--just inside the base. "What about?"..whenever he was admitted. Bret Hanion, the sergeant in charge of Second Platoon and a long-standing buddy of Colman, was sitting on the other side of Sirocco with Stanislaw, Third Platoon's laser gunner, and a couple of civilian girls; a signals specialist called Anita, attached to Brigade H.Q. was snuggling close to Colman ~with her arm draped loosely through his..Bernard's expression was grave and distant. "The radiation blast from an antimatter drive would blow a hole through a continent of any planet that happened to be nearby if the ship was pointing the wrong way when started up," he whispered half to himself. "It's been up there in orbit, right under our noses all the time. They've got the biggest radiation projector anybody ever dreamed of-right there, riding out in space with the Mayflower II. They put kids and comic robots on it, and we never even noticed it."..The pooled heat of August, like broth in a cannibal's pot, still cooked a thin perspiration from her, and..eyes, a flash of teeth in the hooded beam of light. He almost cries out in alarm..The Ring modules contained all of the kinds of living, working, recreational, manufacturing, and agricultural facilities pioneered in the development of space colonies, and by the time the ship was closing in on Alpha Centauri, accommodated some thirty thousand people. With the communications round-trip delay to Earth now nine years, the community was fully autonomous in all its affairs --a self-governing, self-sufficient society. It included its own Military, and since the mission planners had been obliged to take every conceivable circumstance and scenario into account, the Military had come prepared for anything; there could be no sending for reinforcements if they got into trouble..Stanislaw took a long draught from his glass and made a what-the-hell? gesture. "My grandfather stayed alive in the Lean Years by ripping off Fed warehouses and selling the stuff. He could bomb any security routine ever dreamed up. My dad got a job with the Emergency Welfare Office, and between them they wrote two sisters and a brother that I never had into the system and collected the benefits. So life wasn't too bad." He shrugged, almost apologetically. "I guess it got to be kind of a tradition... sort of handed down in the family."..Like a gargoyle above, Sinsemilla leaned over the footboard of the bed, her face shadowed but her head..every time." Finally he smiled..Reaper's robe. "Looks like we're in for another strip down on that goddamn pump," he murmured without turning his head. "Looks like it," Fallows agreed with a sigh..A few seconds

later Lurch, the household robot--apparently an indispensable part of any environment on Chiron that included children--appeared in the doorway. "It slipped," it announced. "Sorry about that, boss. I've wired off an order for a replacement." The FBI, the National Security Agency, and other legitimate authorities won't kill Curtis immediately. Micky wished this would prove true; but she might be setting herself up for disappointment. Faith in the slope from the highway. Three have flashlights, which they've used to flag down the SUVs..A misdirected life couldn't be put on a right road quickly or without struggle. For all of Geneva's. "This July third, just passed, made eighteen years." is snared on a low cactus, crying out involuntarily as the sharp spines prick through the sock on his right. "How do you mean, Jerry?" Lechat asked across the table. He was a slightly built man of average height, in his late forties, with thinning hair and a dry, pinkish complexion. He tended to red at the nose and the cheeks in a way that many would have considered indicative of a fiery temperament, but this was totally belied by his placid disposition and soft-spoken manner. "Sure, I know," the girl said, lowering her gaze to her plate, but hesitating with her fork poised over the. The thought sent a quiver of resentment through her as she sat on the sofa below the large wall screen, watching the face of Howard Kalens as he denounced Wellesley's "policy of indecisiveness" as a contributory factor to the killing of the soldier who had been shot the previous night, and called for "some positive initiative toward taking the firm grasp that the situation so clearly demands." The colonization of Chiron was over..thoroughbred but performed like a worn-out plow horse..Micky had come to the truth.. "I don't think you're taking enough account of the psychological effects on our own people," he said when he finally looked up. "Morale is high now that we're nearly there, and I don't want to spoil it. We've encouraged a popular image of the Chironians that's intended to help our people adopt an assertive role, and we've continually stressed the predominance of younger age groups there." He shook his head. "Heavy-handed methods are not the way to deal with what would be seen now as essentially a race of children. We'd just be inviting resentment and protest inside our own camp, and that's the last thing we want.. "Fear. Shame. I felt dirty." "We're going to have to talk about this, Jay." Bernard's voice was very serious. "I was teasing, really," Murphy said. "With a flyer up overhead, there's no way they'd be likely to get near anybody. But it's customary to go armed when you're not in places like Franklin... just in case..dedication is too effusive and in need of cutting. Well, this time she's wrong.. "Tell the men to stand down," he said quietly to Jarvis. "Deprime the intruder systems and revert the lock to condition green. Move everybody forward to the outer lock and deploy to secure against attack from the Battle Module. Chaurez, get those men down there inside. We're going to need all the help we can get." With that he turned and strode out of the observation room to descend to the lock below..The house around her was another part of it. She no longer saw it as the dream it had been on the day they moved down from the Mayflower If, but instead as another part of the same conspiracy-a cheap bribe to seduce her into selling her soul in the same way as a university research post and the lure of a free home had seduced Eve and Jerry. Chiron didn't want to let her be. It wanted her to be like it. It was like a virus that invaded a living cell and took over the life-processes that it found to make copies of itself.. "Someone gave it to Aunt Geneva for nothing." Sirocco looked worried. "Look, there is a force on its way forward to occupy the nose. We want to avoid any senseless bloodshed. Those locks must be kept open. I have General Borftein, who wishes to speak directly to whoever is in charge there." .to her that acting silly-kid excited about them would help convince Dr. Doom that she continued to. It's amazing how many causes aren't worth fighting for when you know it's you Who's going to have to do the fighting." He shook his head slowly. "No, we don't get too much of that kind of thing." Chapter 17. if melancholy sense of what might have been? but never would be.. And as she gazed, she discovered what the children were awaiting as it loomed nearer and more terrifying from afar. The realization tightened her stomach. Even from fifteen years ago... it was she--for she had come with the Mayflower H. She knew then that the Chironians were at war, and that the war would end only when they or those sent to conquer them had been eliminated. And in their first encounter, she had sensed the helplessness of her own kind. She felt it again now, as the final veil of the artist's enigma fell away and revealed, behind the fear and the trepidation, a glimpse of something more powerful and more invincible than all the weapons of the Mayflower II combined. She was staring at her own extinction.. A whiff of the city has come to this high desert. The warm air is bitter with the stink of exhaust fumes. But SD's were already pouring out of the guardroom behind the main doors of the Government Center and racing along the corridor toward the communications facility while civilians flattened themselves against the walls to get out of the way, and others who had been working late peered from their offices to see what was happening. The engineer in coveralls who had been working inconspicuously at an opened switchbox through an access panel in the floor closed a circuit, and a reinforced fire-door halfway along the corridor - closed itself in the path of the oncoming SD's. The SD major leading the detachment stared numbly at it for a few seconds while his men came to a confused halt around him. "Back to the front stairs," he shouted. "Go up to Level Three, and come down on the other side." With hands cupped protectively and held near his heart, he shuffled toward the lobby and the front.
