

MECHANICAL EQUIPMENT OF BUILDINGS A REFERENCE BOOK FOR ENGINEERS AND ARCHITECTS

"Is she a friend of yours?" Kath inquired. Stanislaw entered more commands. A different table of information appeared on the screen. "SD guard details and timetable for posts inside the Columbia District tonight," Stanislaw said. They would refrain from doing anything to that one until the last moment. "Her mother's dying too," Jay had replied dryly. Colman got Adam talking about his work and about the physical and biological environment of the planet generally. Chiron was practically the same age as Earth, Adam said, having been formed along with its parent star by the same shockwave that had precipitated the condensation from interstellar gas clouds of the Sun and its neighbors. "What about the sentries?" Sirocco asked curtly. "What?" Bobby asked, genuinely surprised by the insult, even though his index finger was still wedged in. "Okay, then what about human beings crossed with puppy dogs?" understanding descend on you so unexpectedly that it just pivots you in a new direction, changes you. Curtis had thought he was being pursued by a platoon. Perhaps it is instead an army. And the enemies of Bernard was watching with interest over Stanislaw's shoulder. After being dropped off by Barbara and reentering Phoenix with the others, he had gone home to update Jean on what was happening and then left for the barracks, where Colman had smuggled him in for the briefing. It was just as well that he had; the scheme that Sirocco finally evolved required some familiarity with the Mayflower II's electrical systems, and while Colman had been prepared have a crack at that part of it, Bernard was the obvious. suddenly found themselves even closer than ten minutes to paradise. "What stuff?" Bobby asked. Bernard stood up. "Sure... don't let me keep you if you have things to do. Thanks for letting me have the cutter back." He turned his head toward the dining area and called in a louder voice, "Hey, you people wanna say good-bye to Jerry? He's leaving." Pernak and lay waited by the door for lean and Marie to appear. "They've already got security," Nanook declared. "And if they're not rich enough already, how is some crazy supposed to help?" cruising at sixty miles per hour. faces? that's scarier than sleeping with a nuclear bomb under your bed. Continuing to snarl soundlessly at the mirror, the stranger employs a fingernail to pick between two teeth. the eve of her birthday would violate Preston's code of ethics, and he was as serious about his ethics as held fast to the idea that this service to Laura might eventually redeem him. The hope of atonement was nature only from movies, books, and a few casual encounters. punctuated by spells of bewildered placidity. "There's also beer. Your uncle Vernon liked two icy beers more evenings than not." "That's a strange offer," Otto said to Stern. "You offer protection, but the only protection anybody would appear to need is against you in the first place. After all, you've just told us that you hold all the weapons. You seem to entertain a curious notion of logic." Sirocco shrugged noncommittally. "Can't say. I wouldn't worry too much about it. If you stick close to Steve and Bret and do what they tell you, you'll come through okay." Although they couldn't claim to be campaign veterans, Colman and Hanlon were among the few of the Mission's regulars who had seen combat, having served together as rookie privates with an American expeditionary unit that had fought alongside the South Africans in the Transvaal in 2059, the year before they had volunteered for the Mayflower II. The experience gave them a certain mystique-especially among the younger troops who had matured-in some cases been born and enlisted--in the course of the voyage. Howard learned about it, Celia closed her eyes as if she were trying to shut out a memory that she was seeing again. "He lost control of himself completely there was a fight, and.." She left the rest unsaid. After a few seconds she opened her eyes and stared blankly ahead again. "Maybe I wanted him to find out-provoked him to it. You see, after all that time, maybe I knew deep down that I couldn't just walk away and leave him like that either.' What other way was there?" Her eyes brimmed with tears suddenly, and she brought her handkerchief to her face... . wasn't he Frank Sinatra?" scar tissue. "Of course, dear." Geneva poured from a glass pitcher that dripped icy condensation. undulant glow across her face, brightening her eyes but failing to dispel the shadow of confusion in which. LEIGHTON MERRICK FORMED his fingers into a fluted column to support the Gothic arch of his brows down at the desk while he chose his words. "Ah, I've been looking over your record, Fallows," he looked up. "It shows a consistent attention to detail that is very pronounced . . . everything thorough and complete, and properly documented. It's commendable, very commendable . . . the kind of thing we could do with more of in the Service." Anyway, the headshrinkers shot like nine hundred thousand volts through old Sinsemilla's noggin, unless. "By your customs," the Chironian observed. Oh, Lord, there's just one door, the sucker's magically locked, all his tricks are thwarted, and he's also burned from her all illusions. She didn't entertain fantasies derived from the movies or from any other. "So, is this fine young fella the Jay you were telling me about?" Hanlon asked. Colman grinned. "Good thinking. We were starting to talk shop." Re inclined his head to where Veronica was still talking animatedly between Kath's twin sons and evidently enjoying herself. "Somebody seems to be quite a hit over there." concentrate on your lessons when your teacher has his hand up your skirt. "Sometimes," Shirley answered. "Ci teaches English mainly, but mostly down on the surface. That is, when she's not working with electronics or installing plant wiring underground somewhere. I'm not all that technical. I grow olives and vines out on the Peninsula, and design interiors. That's what brought me up here--Clem wants the crew quarters and mess deck refitted and decorated. But yes, I teach tailoring sometimes, but not a lot." As far as Borftein could see, with himself and the Army behind him, Kalens had all the authority he needed-provided, of course, that he won the upcoming

election. But after talking to Sterm about it, Kalens had accepted that an attempt to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borftein later. "A visible commitment to lawfulness as a alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borftein had -agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space..grass extended from one side of the lot to the other, but it provided a scant twelve feet of turf between."I've got more than enough to destroy Jonathan without this. Micky fell silent, surprised by what she had been about to say.."I don't think you're taking enough account of the psychological effects on our own people," he said when he finally looked up. "Morale is high now that we're nearly there, and I don't want to spoil it. We've encouraged a popular image of the Chironians that's intended to help our people adopt an assertive role, and we've continually stressed the predominance of younger age groups there." He shook his head. "Heavy-handed methods are not the way to deal with what would be seen now as essentially a race of children. We'd just be inviting resentment and protest inside our own camp, and that's the last thing we want.."We're looking into that. It will depend on how many people Steve can spare. Now, if Bret can get there from the Columbia District after the transmission has gone out, then that might put a different.. ." Sirocco's voice trailed away, and his mouth hung open as he stared disbelievingly toward the door at the back of the room. The heads turned one by one, and as they did so, gasps and mutterings, punctuated by a few good-natured jeers, began breaking out on all sides. /He remembered lay's mentioning a physicist from the labs in the Princeton module who said that human societies were the latest phase in the same process of evolution that had begun billions of years ago when the universe started to condense out of radiation.
